Subject: Use of Area next to San Jacinto Bridge at I-10 / Lynchburg Crosby Rd for unloading Barges and oncarriage to Exxon Mobil plant

Dear Sir,

this morning I had an appointment with Brian Darnell and Billy Pampell of Cheryl K, LLC / San Jacinto River Fleet, LLC. Kindly Brian Darnell provided your contact details to me after that meeting.

Linde AG Engineering Division is a big and well experienced company for plant engineering and construction. For our customer Exxon Mobil we have to deliver and erect a plant at their Baytown area.

We learned from local Heavy Hauliers (Mammoet, Barnhart, Davonport) that they used the area near San Jacinto Bridge for unloading Heavy Lift Equipment in the past already. Due to the sizes and the weights of our Equipments we would like to use it as well as it offers the shortest and most economic route to our site.

We understand the importance of the area and would like to do the utmost not to destroy the balance neither of San Jacinto River nor of whole water system and supply in the region.

For this we kindly ask for your approval to use the area for approx 20 to 25 barge unloading within up to two years. The barge operations will be done by a local provider who is familiar with the system and experienced with such operations.

If possible I appreciate a personal meeting on short term notice as I am in Houston actually until Friday only.

For any further information I'm available under phone
0160-885 77 71
at any time.

Looking forward getting your approval to use the area for our operations.

Mit freundlichen Grüßen / Best regards

Jochen Helfers

Dear Sirs,

this morning I had an appointment with Brian Darnell and Billy Pampell of Cheryl K, LLC / San Jacinto River Fleet, LLC. Kindly Brian Darnell provided your contact details to me after that meeting.

I would like to explain what kind of Company Linde AG - Engineering Division - is, what we do and why we are interested to use the area near San Jacinto Bridge.

Linde AG Engineering Division is a big and well experienced company for plant engineering and construction. For our customer Exxon Mobil we have to deliver and erect a plant at their Baytown area.

We learned from local Heavy Hauliers (Mammoet, Barnhart, Davonport) that they used the area near San Jacinto Bridge for unloading Heavy Lift Equipment in the past already. Due to the sizes and the weights of our Equipments we would like to use it as well as it offers the shortest and most economic route to our site.

We understand the importance of the area and would like to ask for necessary engineering drawings for the Trinity River Canal waterway siphon and the bearing capacities for the existing roads. As there is a huge number of Equipment to be handled we would like to use the area for up to two (2) years. As sustainability is one of Linde AG's major principles, we will prepare the bank slope and the road for our needs in close coordination with your Authority.

If possible I appreciate a personal meeting on short term notice as I am in Houston actually until Friday only.

For any further information I'm available under phone
0160-885 77 71
at any time.

Looking forward meeting you on short notice.

Mit freundlichen Grüßen / Best regards
